Registered in	The Netherlands
Chamber of Commerce (KvK)	42192500
Website	https://stratakernel.nl

Platforms	iPhone, iPad and macOS
Effective date	9 November 2026
Contact	support@stratakernel.nl

1 Scope and controller

This policy explains how 3D Christmas Tree version 1.2 build 41 handles information on iPhone, iPad and Mac. E.G. van Zeeland, trading as StrataKernel (stratakernel.nl), is the publisher and controller for processing within its responsibility. Send privacy enquiries to support@stratakernel.nl.

The App works without a StrataKernel account. It creates trees and cards on your device. Online activity includes optional background downloads, support links and any external services you choose to use.

2 Local designs and preferences

The App saves your current design locally in Application Support. It stores tree decorations, backgrounds, card text and sender names, selected music and layout settings. The App also keeps preferences, such as your language choice, on the device. Undo and Redo may retain earlier design states during the session.

The App displays bundled messages and artwork and plays the selected Christmas music from local resources. Using these features sends no user data to OpenAI or ButtonBass. The App uses no advertising, advertising identifier, cross-app tracking or third-party analytics SDK. StrataKernel does not sell or rent App user data.

3 Photos and selected files

Apple’s Photos picker supplies the photo you choose without giving the App unrestricted access to your library. The system file picker supplies an image or design file you select. Apple Photos, iCloud or another file provider may retrieve a cloud-stored original under your settings.

The App resizes imported backgrounds to a maximum dimension of 1920 pixels and saves a JPEG copy without the original EXIF or GPS metadata. The original file stays in its source location. The visible image can still identify people or places. Selecting a different background can leave the photo embedded in the saved design.

The creative features use a non-AR scene and require no access to your camera, microphone, device location, contacts or health data.

4 Optional downloads and support links

When you request the demo backgrounds, the App downloads a ZIP archive from stratakernel.nl. The site and its hosting provider receive ordinary request information such as your IP address, requested address, request time and technical headers. Opening support links also sends request information to the destination. Download requests contain no designs, photos or greetings. The App lets you save the ZIP and leaves extraction to you.

5 Card exports and sharing

The App prepares still cards (PNG) and movie cards (MP4) on your device. A finished card can contain your greeting, name and visible background. A movie can also contain the selected music. A reusable JSON design can include the saved photo even when the photo is hidden in the current view.

When you choose to share, email, print or save to a cloud provider, the system passes the selected content to the service you choose. The email feature opens a draft for you to address and send. StrataKernel does not run a card delivery service. Recipients and providers may retain or forward copies under their own policies.

6 Apple services and purposes of processing

Apple independently handles App Store transactions, payments, backups, iCloud and system diagnostics under its terms and your settings. Apple may make sales or diagnostic reports available to StrataKernel through its developer services.

Apple Privacy Policy

Where the GDPR applies, StrataKernel relies on performance of the App service for processing necessary to provide the features you request. Optional photo selection and sharing depend on your choice and consent where required. StrataKernel relies on its legitimate interests in securing downloads and answering support requests, or on a legal obligation when one applies.

7 Retention and deletion

Local designs and settings stay until replaced or removed. Earlier designs and temporary exports may remain. Clearing the tree removes ornaments. To remove a stored photo from the current design, replace the photo or load a design without it. To erase all local App data, delete the App on iPhone or iPad, or remove its Application Support and preferences data on Mac. Offloading on iPhone or iPad can preserve data. Manage exported files, backups and shared copies separately.

StrataKernel uses your contact details, message and any attachments you send to handle your support request. It reviews correspondence annually and keeps it only as long as needed for follow-up, applicable legal duties or claims. Hosting request data is used for delivery and security. Independent providers set retention for the data they control.

8 Choices and privacy rights

Use built-in artwork without selecting a photo, skip optional downloads and choose whether to share. For data StrataKernel handles, you may have rights to access, correction, erasure, restriction, portability and objection. You may withdraw consent without affecting earlier lawful processing and complain to a supervisory authority, including the Dutch Autoriteit Persoonsgegevens. Email support@stratakernel.nl. GDPR requests receive a response within one month, subject to lawful extensions. StrataKernel has no access to designs stored only on your device.

EU information on data protection rights

9 Security and international processing

The App uses Apple’s file and photo access controls and HTTPS for downloads. Local data is subject to the security of your device and backups. Apple and providers of hosting, email, cloud storage or sharing may process information outside the European Economic Area. Their privacy information describes their processing and transfer safeguards.

10 Children changes and contact

The App does not profile children or use their information for advertising. Parents or guardians should supervise photo selection, sharing and support enquiries. This policy may change with the App or its data practices. Send questions to support@stratakernel.nl. Current documents are available through the App’s support links at stratakernel.nl.
