

Cuckoo Clock Privacy Policy

Developer / Publisher: E.G. van Zeeland

Platforms: iPhone, iPad and macOS

Effective date: 19 August 2026

1. Scope

This Privacy Policy applies to the Cuckoo Clock application for iPhone, iPad and macOS (the "App"), published by E.G. van Zeeland. It explains how information is handled when you use the App.

2. Personal Data Collected by the App

The App is designed to operate without creating a user account and without asking you to provide personal information.

The App does not intentionally collect, transmit, sell, rent or share personal data for advertising, profiling or cross-app tracking purposes.

- No user account or registration data is collected.
- No precise or approximate location data is collected.
- No contacts, photos, videos, microphone recordings or health data are collected.
- No advertising identifiers are used by the App.
- No third-party advertising or tracking SDKs are included in the App as described by this policy.

3. System Date, Time and Device Functions

The App uses the date and time provided by the operating system to display the clock and to determine time-dependent behaviour, including hourly cuckoo events and seasonal or holiday visual variations. The App does not need to transmit the device's date or time to the developer for this purpose.

The App may also use ordinary device functions such as audio output, haptic feedback and display-awake behaviour when those features are enabled. Use of these functions does not, by itself, require the developer to collect personal data.

4. App Preferences and Local Storage

Preferences such as visual settings, selected backgrounds, sound settings or similar configuration data may be stored locally on your device so that the App can remember your choices.

These locally stored settings are used to operate the App and are not used by the developer to create a user profile.

5. App Store Purchases and Payments

If you obtain the App through Apple's App Store, purchases, payment processing, receipts and related account information are handled by Apple under Apple's own terms and privacy practices.

The App does not receive your full payment-card details. Apple may provide developers with transaction or sales information needed to operate the App Store distribution relationship.

6. Analytics, Diagnostics and Crash Information

The App does not include third-party analytics, advertising or tracking services as described by this policy.

Apple may process device, App Store, diagnostic or crash information independently under your Apple settings and Apple's privacy terms. Depending on your Apple privacy settings, Apple may make limited diagnostic or aggregated information available to app developers. Any such information is separate from in-app tracking and is not used by the developer to build advertising profiles or to track you across other companies' apps or websites.

7. Third-Party Services and External Links

The App or its documentation may provide links to support pages on StrataKernel.nl, the online user manual or Apple services.

When you choose to open an external website or service, that third party may process information under its own privacy policy. This Privacy Policy does not govern third-party websites or Apple's own processing activities.

8. Children's Privacy

The App is a general-purpose clock and entertainment application. It is not designed to collect personal information from children, and the App does not intentionally collect personal data from children.

9. Data Retention and Deletion

Because the App does not maintain a developer-operated user account or database of personal user information as described above, there is ordinarily no personal account data held by the developer for you to request deletion of.

Locally stored App preferences can normally be removed by changing the relevant settings or uninstalling the App. Information processed by Apple is subject to Apple's own retention and account-management procedures.

10. Security

The developer aims to minimise privacy risk by limiting the collection of information. No method of electronic processing can be guaranteed to be completely secure, but the App is intentionally designed to avoid unnecessary collection and transmission of personal data.

11. Changes to This Privacy Policy

This Privacy Policy may be updated if the App's functionality, data practices, legal obligations or distribution model change. The current version should be made available through the App and on StrataKernel.nl. The effective date shown at the top identifies the current version.

12. Contact

Privacy enquiries concerning the Cuckoo Clock App may be submitted to E.G. van Zeeland through the Contact page on StrataKernel.nl.

Document note: This text is intended for publication with the Cuckoo Clock app and on StrataKernel.nl. It should be reviewed whenever the app's data practices, third-party SDKs, permissions, payment model, or functionality materially change.
