Platform	iPhone
Effective date	15 November 2026
Contact	support@stratakernel.nl

1 Publisher and scope

PanoViewer for iPhone (the App) is published by E.G. van Zeeland, trading as StrataKernel. This notice covers version 1.0, build 31, its documentation and original content. The accompanying Privacy Policy describes access to selected panoramas, metadata, the optional demo download and on-device speech recognition.

2 App Store licence

For an App Store edition, Apple’s Standard End User License Agreement applies unless a separate custom end-user licence is supplied. This notice supplements the applicable licence. Mandatory consumer rights continue to apply.

Apple Standard EULA

3 Purpose and supported images

The App displays full 360° × 180° equirectangular panoramas and Camera panoramas recognised through Photos. You can explore a still image by touch, iPhone motion, or optional spoken commands. A compatible phone headset can show a view to each eye from the same panorama and capture point.

PanoViewer is for viewing and illustration. Panorama stitching, the estimated capture angle, headset optics and source metadata can affect the appearance of a scene. Use independent measurements for geological, survey or other decisions that require accurate geometry.

4 Image and metadata limitations

A 2:1 image can pass the aspect-ratio check even if it was made with another projection. Incompatible or unreadable files may be skipped. The App displays at most 6,144 pixels along the longest edge and scales larger images for viewing. It leaves source files intact.

Info may show the filename, source dimensions, capture date, caption, place and coordinates when available. Those fields can be incomplete or inaccurate. They do not authenticate the date, place or subject of a photograph.

5 Headset fit and safe use

Use an enclosing headset seated in a safe place. Keep it off while walking, driving or operating equipment. Follow the headset maker's fit, supervision and safety instructions. Stop and remove the headset if you feel eye strain, headache, nausea, dizziness or other discomfort.

Secure the iPhone in the holder and centre the display. Calibration adjusts image height, horizontal eye spacing and zoom on screen. Lens Correction changes radial image warping for the headset. These software adjustments cannot determine physical pupil distance, set lens focus or guarantee a comfortable fit.

6 Voice control

Voice control requires iOS microphone and speech recognition permissions and an available on-device recogniser for the selected language. Recognition can miss or misinterpret commands and can be interrupted. Touch controls remain available. Avoid relying on speech recognition where a missed command could affect safety.

7 User images and demo downloads

Use images and associated metadata you are authorised to view or share. The original rights holders retain their rights. Review captions, coordinates and visible content before sharing screenshots or files.

The optional demo download supplies sample panoramas for use with PanoViewer. Any reuse or redistribution is subject to the applicable rights and permissions for each image. The App's software licence does not grant separate rights in demo images.

8 Copyright and third-party names

Copyright © 2026 StrataKernel.nl. All rights reserved. Rights in the original software, interface, branding and documentation are reserved to the extent provided by applicable law. Third-party works and user images remain subject to their own rights, licences and permissions.

Apple, iPhone, iOS, Photos, iCloud and App Store are Apple marks. Google Cardboard identifies a Google product. References identify compatible equipment or services where applicable. PanoViewer is independent of their manufacturers and service providers.

9 Compatibility and consumer rights

Compatibility depends on the iPhone, iOS version, accessory and source file. Network availability may affect cloud files and demo downloads. Nothing in this notice restricts statutory guarantees, remedies or liability that applicable law does not allow to be restricted.

10 Effective date and contact

This notice is effective from 15 November 2026. Contact E.G. van Zeeland / StrataKernel at support@stratakernel.nl for questions about the App, copyright or this notice.
