PanoViewer Privacy Policy

Official product information for PanoViewer

Publisher	StrataKernel
Legal owner	E.G. van Zeeland, trading as StrataKernel
Legal form	Sole proprietorship (Eenmanszaak)
Registered in	The Netherlands
Chamber of Commerce (KvK)	42192500
Website	https://stratakernel.nl

Platform	iPhone
Effective date	15 November 2026
Contact	support@stratakernel.nl

1 Scope and controller

This policy covers PanoViewer for iPhone (the App), version 1.0, build 31. E.G. van Zeeland, trading as StrataKernel, is the publisher and controller for processing within the publisher's responsibility. Contact support@stratakernel.nl for privacy enquiries and rights requests.

The App runs without a StrataKernel account. The App code processes selected panoramas on the iPhone and does not send them to the publisher for rendering.

2 Photos and Files access

Photos. With your permission, the App lists accessible albums and reads images and their metadata. Full Photos access enables the album list. Limited access provides the photographs you have allowed. iOS calls the permission read/write. PanoViewer uses it to read existing items.

Files. The App reads compatible images in the folder you select through Files. Only files immediately inside the selected folder are scanned. Photos and file providers may download cloud originals under your settings. PanoViewer leaves source images intact.

3 Panorama information and motion

Info can display the filename, position in the collection, source dimensions and available date, caption, place or coordinates. Photo coordinates describe the source image. The App does not request current GPS location. Direct access to a caption stored in Photos requires iOS 27 or later. Embedded captions may be available on earlier versions.

When Motion is on, the App uses iPhone motion and orientation readings to steer the view. It does not save or send those readings. Review visible image information before sharing a screenshot.

4 Microphone and on-device speech recognition

The optional voice test and active viewer voice control require iOS microphone and speech recognition permissions. The microphone may capture surrounding speech and sound while active. The App requires an on-device Apple Speech recogniser and has no online recognition fallback.

The App uses recent recognised text and commands as temporary feedback. It does not save audio recordings or a transcript history. Turn Voice off, stop the test, or leave the viewer to stop listening. Apple's orange microphone indicator can remain visible while the microphone is active.

Apple privacy policy

5 Demo downloads and storage

When you tap **Download demo files**, the App requests the ZIP from stratakernel.nl. The site and its hosting provider receive ordinary web request information such as the IP address. The App keeps a temporary copy and opens the iOS Files picker so you can save the archive. It attempts to delete the temporary copy when the picker closes. A saved copy remains in the location you choose.

An interruption can leave temporary data for iOS or app removal to clear. If you choose a cloud folder, the file provider handles any sync under your settings.

6 Local preferences and retention

The App stores voice preferences, estimated capture angle, lens correction and saved headset alignment on the iPhone. Active collection and preview data are held for the app session. Returning to the menu keeps the current collection available during that session.

Deleting the App normally removes its local app data. Offloading or device backups can retain preferences under iOS settings. Original photos and demo files saved outside the App remain under your control.

7 External services and support

Apple handles App Store access and transactions. Apple, cloud storage and file providers apply their own terms and privacy practices. The publisher receives ordinary correspondence information when you contact support, including your address, message and any attachments you choose to send.

The current App includes no advertising or third-party tracking SDK. Support correspondence is used to respond to your request and retained as needed for the enquiry and applicable obligations. Avoid including private photographs, coordinates or unrelated speech in support requests.

8 Purposes choices and rights

Processing needed for display, navigation and a requested download serves the functions you choose. Optional photo and speech access follows your iOS permissions. Support correspondence is used to answer requests and, where applicable, for the publisher’s legitimate interest in resolving issues or meeting legal obligations.

You can change permissions in iPhone Settings, choose a Files folder instead of Photos, or turn voice control off. Depending on applicable law and the processing concerned, you may have rights to access, correct, erase, restrict, port or object to processing of your data. You may also withdraw consent where it applies or complain to the Dutch Autoriteit Persoonsgegevens. Contact support@stratakernel.nl.

European Commission guidance on data protection rights

9 Changes and contact

This policy is effective from 15 November 2026. It may change if app functions, providers or data practices change. Contact E.G. van Zeeland / StrataKernel at support@stratakernel.nl.
